

# PML Parachute Selection Chart

## Streamer: <16 oz.

Streamer is suitable for a drogue on rockets weighing 16 to 60 oz.

## PAR-18: <12 oz.

PAR-18 has a ~4" spill hole, and is suitable for a drogue on rockets weighing 16 to 120 oz.

## PAR-X-FORM: Drogue

The X-form parachute is intended for use as a drogue on rockets weighing 90-180 oz.

## PAR-24: 12-26 oz.

Approx. 5" spill hole

## PAR-30: 24-34 oz.

Approx. 5" spill hole

## PAR-36: 30-42 oz.

Approx. 8" spill hole

## PAR-48: 36-54 oz.

Approx. 8" spill hole

## PAR-54: 50-90 oz.

Approx. 10" spill hole

## PAR-60: 90-160 oz.

Approx. 12" spill hole

## PAR-72: 160-220 oz.

Approx. 14" spill hole

## PAR-84: 200-260 oz.

Approx. 16" spill hole

## PAR-96: 250-320 oz.

Approx. 16" spill hole

## PAR-120: 416-880 oz.

Approx. 20" spill hole

(PAR-120: 26 lbs. @ 15fps, 55 lbs @ 30 fps)

(If a particular rocket has protrusions or other delicate items that might be damaged on landing or is likely to land on a hard surface, select the next larger chute for that application.)
