Based on the U.S. Air Force Bull Pup missile, the Bull Puppy 2.1 is the latest addition to the Bull family of rocket kits. A great starter kit with excellent styling and performance. This puppy is perfect for pre-cert F and G flights and smaller fields. Comes complete with military style decals and a pre-slotted, plastic boattail.

Features Include:

- Flies great using F through H motors
- Pre-slotted boattail
- Quantum Tube airframe
- G-10 fiberglass fins
- Piston ejection system
- Multi-panel nylon parachute
- Plastic nosecone
- Thin-wall brass launch lug
- Decal sheet
- Explicit instructions

Dia.: 2.1”  Height: 27.75”  Weight: 20 oz.  MMT: 29mm  Chute size: 24”  Launch lug: 1/4”

Recommended motors and predicted altitude chart

All motors shown are Aerotech. Information displayed as Altitude in Feet, Optimal Delay in Seconds

Shaded cell means this motor/rocket combination requires absolutely top-notch construction to fly successfully. Other motors can also be used but some may require modifications to the kit.

Always refer to the Motor Recommendations Chart at www.publicmissiles.com for the latest information.
